Filling/Capping Monoblocs

In-line Exacta filler

Series-L

The letter "L" identifies linear fillers, which can be assembled in monobloc with a capping unit for screw-on or press-on caps.

According to the kind of product, these machines can be equipped with magnetic or mass flowmeters. The high flexibility of operation is the element that characterizes this type of machines: in fact, there is no need of change parts for passing from one

Model "Exacta-L"
