Filling/Capping Monoblocs

Series-R

The "R"-version identifies machines manufactured in stainless steel to handle viscous, abrasive or foamy products. The parts in contact with the product are made of Aisi 316 L stainless steel.

The EXACTA series fillers utilize magnetic or mass flowmeter technology and represent the benchmark in volumetric and weight filling machines available on the world wide market today. Precision dosing at 0.2% standard deviation provides for reduced costs of operation.

EXACTA-R

With magnetic flowmeters designed to handle aqueous, viscous, abrasive or foamy liquid products.

- All parts in contact with the product are made of AISI 316L stainless steel.
