# Swirlfill Swirlfill Filler

**DTM**  
Packaging, LLC

Packaging/Bottling Machinery  
and Engineering Services

## Special Features:

The filler is furnished with filling valve assemblies with 3 passages designed for filling three individual products simultaneously.

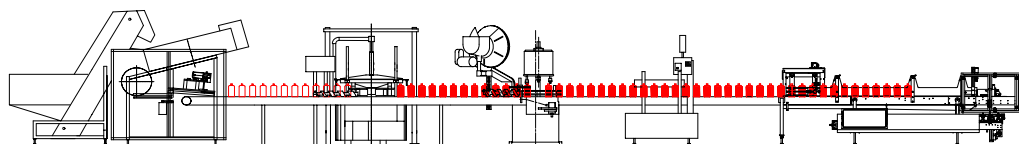

Three separate fluid supply vessels with removable covers for discharging three products.

Three individual product supply feed tubes to feed into a single manifold that will feed each product into each filling nozzle, keeping each product separated.

Bottom-up fill capability with nozzle insertion into the container.

Synchronized servo driven platform rotation and nozzle insertion

All liquid contact parts are 316 stainless steel or FDA approved materials.
